New Dual Purpose Insulation

- For All Insulation Requirements
- New or Existing Homes
- Pest Control Insulation Systems comprising of either Cellulose or Batt installations
- Fully Patented pest system treatment to fully envelope the insulation installed

1800 814 199

APVMA Approval No. 41790

What's in the Ceiling & Walls

T.A.P is the result of a patented combination of a Non Toxic pesticide with the best insulation that:

- Controls Pests
- Saves Energy & Money
- Absorbs Sound
- Contains All-Natural Ingredients (cellulose or fibre glass)
- Is Environmentally Friendly
- Delivers Fire Resistance
- Is Permanent
- Provides Perfect Fit

T.A.P Kills Bugs

Insects cannot build up a tolerance to T.A.P, as they can with organic biological treatments, and you never need to re-treat the insulation or Building components in contact with insulation. T.A.P controls cockroaches, silverfish, as listed on the APVMA approved label and is known to control other crawling insects as well.

APVMA Registered Active

Boric Acid, the active ingredient in T.A.P, is found in common household products such as saline eyewash solution, detergents, and the food we eat. Although deadly to many insects, T.A.P is acceptable for use around pets and people. The non toxic powder formulation used in the patented T.A.P Pest Control Insulation system is registered by Australian Pesticide and Veterinary Medicines Authority No. 41790. T.A.P complies with AS/NZS 4859.1 and AS 1530.0.

Save Money

T.A.P helps keep homeowners cool in the summer and warm in the winter. Comfort. Conservation. **Comfortable Conservation!**

Fire Safety

T.A.P (cellulose), with its fire-retardant characteristics, limits the spread of fire with both flame and smoulder combustion resistance.

The Quiet Life

T.A.P reduces annoying outside noise and helps create a peaceful haven of quality and solitude.

T.A.P is Green

Well, not literally, but T.A.P is permanent, made from all-natural ingredients and recycled newsprint (cellulose T.A.P or glass batt T.A.P), thus while you're controlling pests and saving energy, you're conserving landfill space.

A Perfect Fit

T.A.P (cellulose) form and batts are a perfect fit in your home leaving no gaps, covering nooks and crannies, capping the entire ceiling, walls or suspended floor. T.A.P helps block heat transfer from convection and radiation, as well as conduction; providing comfort for your family and friends.
